2. Installation of InPost application

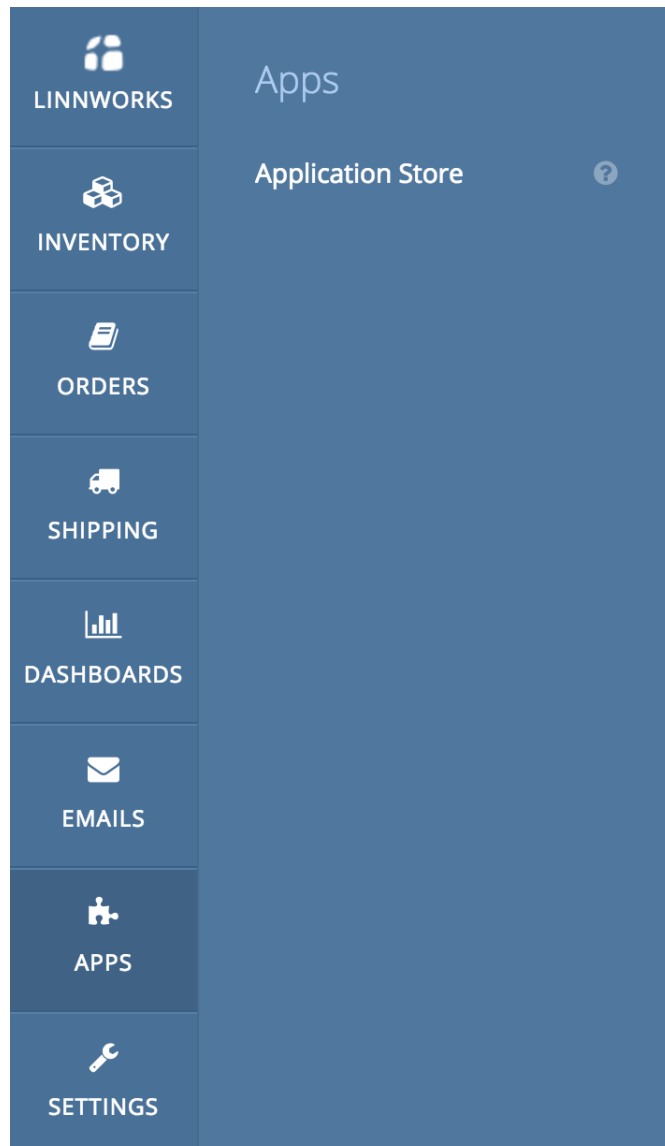

In order to configure integration between your Magento store and Linnworks, please follow this article:

https://www.linnworks.com/Doc/Magento_Setup_Channel_Integration .

Orders should start flowing in from Magento into your Linnworks account once the above configuration is complete.

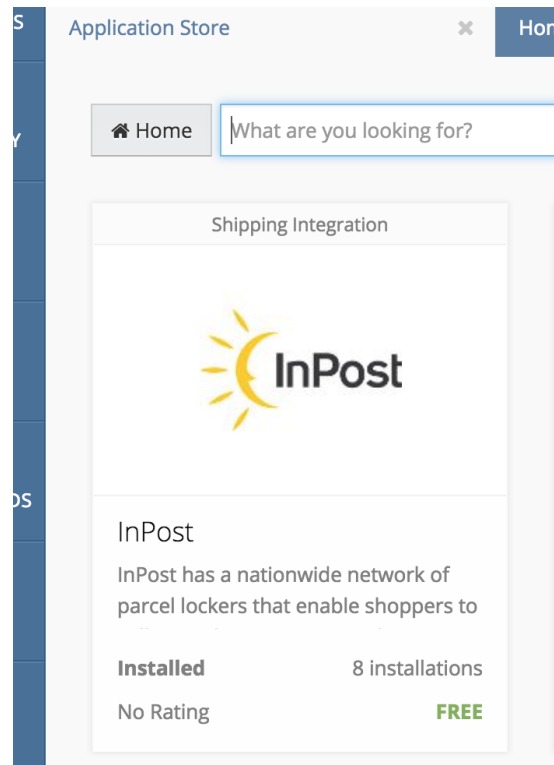

In the meantime let's configure Linnworks integration with InPost In order to enable integration, please install InPost application following steps below:

1. Proceed to the tab Apps -> Application store

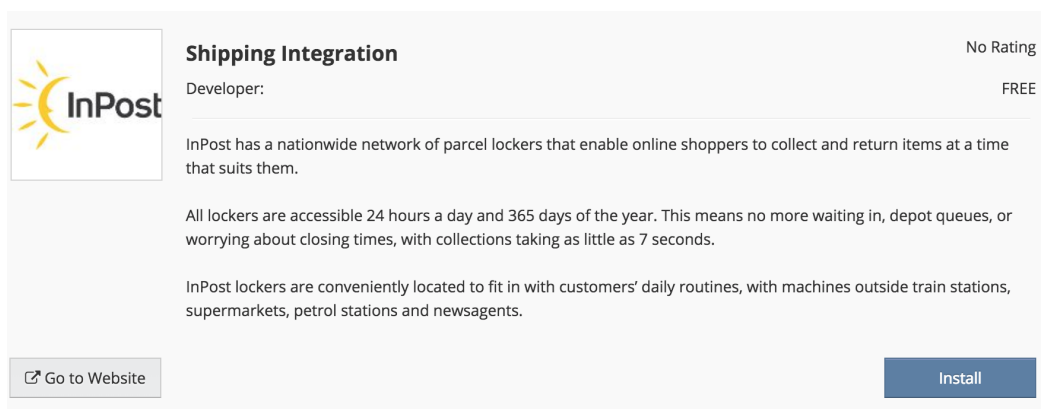

2. Type in InPost in the search box:

3. Open up the application and hit install button:

4. If you are happy with the terms below, hit “Accept” button.

Third Party Integrations Disclaimer

Linn Systems do not warrant that the Third Party Integration, as supplied by the developer, will meet your expectations in terms of performance or functionality.

By installing any third party application you accept full responsibility for the selection of the Third Party Integration, its use and any changes the Third Party Integration makes to your Linnworks account.

By continuing with the installation you are agreeing to the terms and conditions at the link below:

[Full Application Terms And Conditions](#)

Accept

Decline

5. On the next step, you'll need to confirm that you're happy that InPost application will use this information from your account:

1. Email address which account is registered with:
2. Order data, such as:
 - a. First and last name of customers;
 - b. Shipping address;
 - c. Phone number provided in the order;

InPost - Installation

6. Once you are familiar with the tariff plan, please continue with “Install” button.

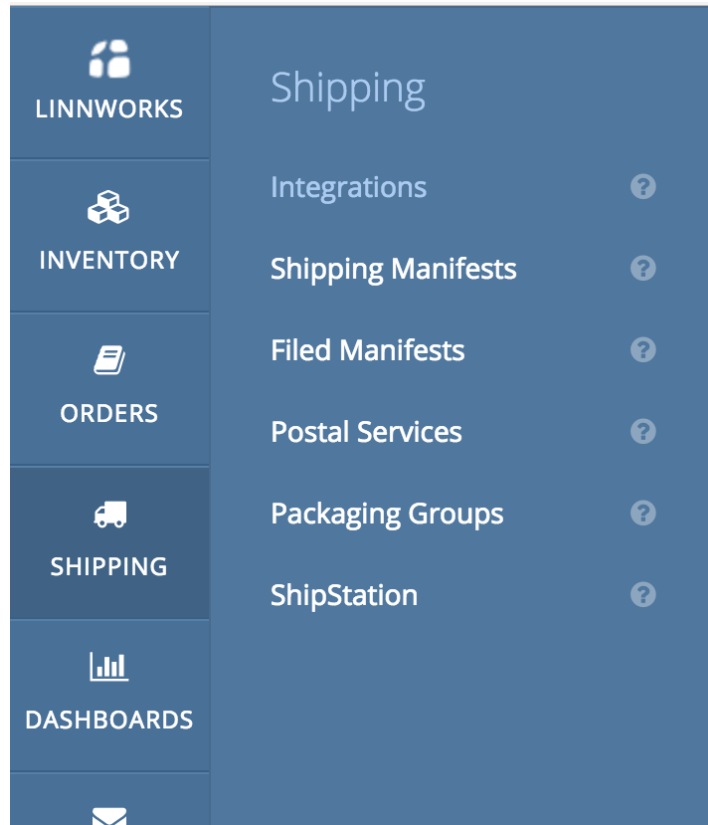

7. Installation of InPost application is complete at this step.

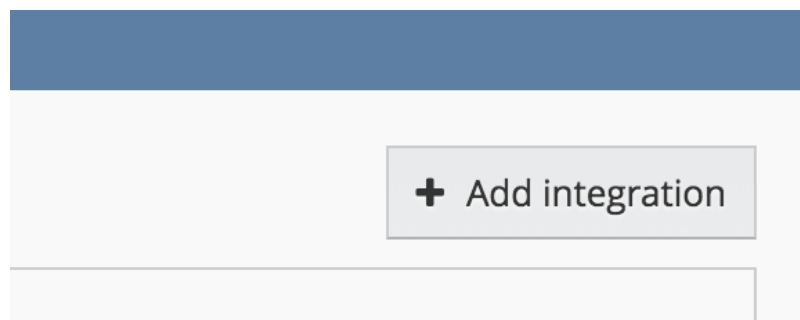

3. Setting up shipping integration

1. In order to configure shipping integration, please select Shipping -> Integrations in the menu:

3. Add shipping integration with the button “Add integration” as shown below:

4. Scroll down to InPost Shipping and hit “Integrate” button next to the app:

A screenshot of a web application window titled "Shipping Service - Setup wizard". It displays a list of shipping services with their respective logos, developer information, and version details. The "InPostShipping" service is highlighted, and its "Integrate" button is visible. Other services include ParcelStation, wnDirect, SmartConsign Multi-Carrier Shipping, and Express Freight, each with an "Install" button. At the bottom right, there are "Next" and "Cancel" buttons.

Service	Developer	Version	Price	Action
ParcelStation	MagmaTrading	Version 5.0	Free	Install
wnDirect	wnDirect	LIVE	Free	Install
InPostShipping	Documentation	Version 3	Free	Integrate
SmartConsign Multi-Carrier Shipping	CloudStuff Ltd.	Version 3 (Verified)	Free	Install
Express Freight	Express Freight	v1.1		Install

5. Name the integration as you prefer, for example inpost-address2locker, can be used to differentiate between multiple integration there're few:

A screenshot of a web application window titled "Add InPostShipping Shipping Integration". It prompts the user to enter an account name for reference. The text states: "Please enter account name for your own reference. This should be a unique name to help you to identify integration within the system." Below this, there is a label "Account Name:" followed by an empty text input field. At the bottom right, there are "Next" and "Cancel" buttons.

Please enter account name for your own reference. This should be a unique name to help you to identify integration within the system.

Account Name:

6. Now enter your InPost credentials (provided by sales@inpost.co.uk), email address goes in "Customer ID" field and Access Token should be filled with the token provided:

Define Account Details

Define the account details and access credentials provided by InPost

7. The integration configuration is now complete. We can now proceed with shipping service configuration.

Registration Complete

You may now add services.

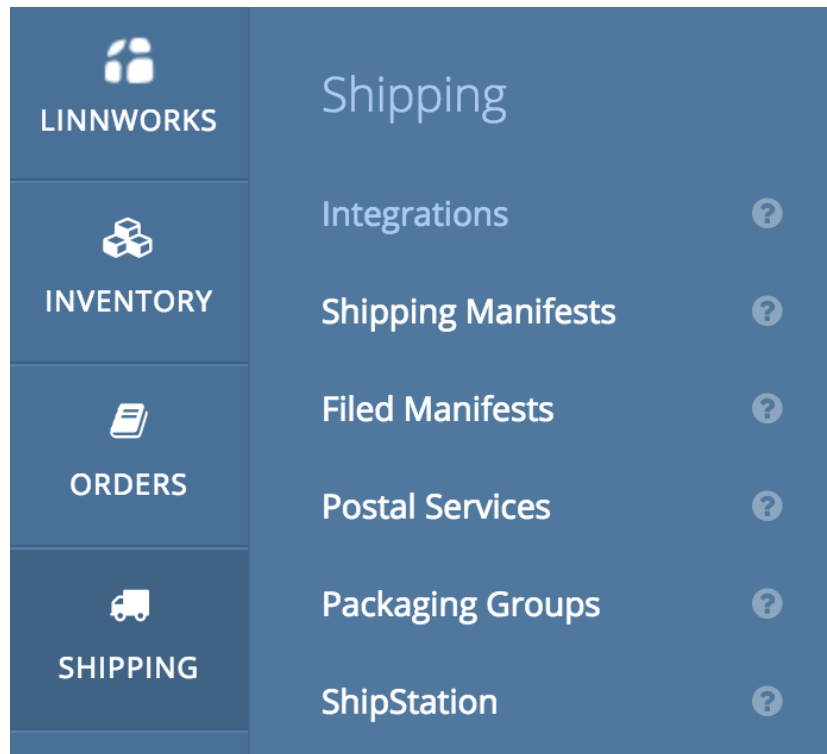

✓ Close

4. Create shipping service

In order to use shipping methods we have to configure shipping service:

1. Open Shipping -> Integrations in the menu:

2. In the table with integrations, press Services button:

Vendor	Account Name	Services	Status						
Generic Shipping		9	Complete	Printer	Quotes	Config	Services	Properties	
InPost	InPost Manual	0	Complete	Printer	Quotes	Config	Services	Properties	

3. In the drop down, select "InPost Next Day Locker Delivery" and hit "Add":

<input type="text"/> Add			
Service Code	Service Name	Group Name	Linnwork Service

4. It's possible to amend Service Name in "Linnworks Service" field. Once all the changes are complete, please hit "Finish".

InPost Next Day Locker Delivery ✎ Add

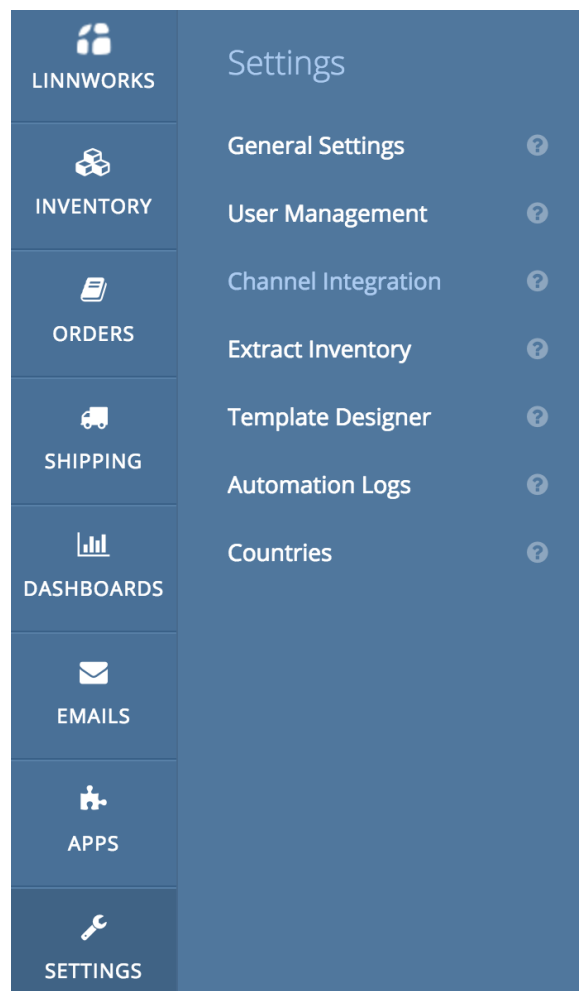

Service Code	Service Name	Group Name	Linnworks Service	Status	
AZL	InPost Next Day Locker Delivery		InPost Next Day Locker Delivery fc	New	🔗 ✎ Edit 🔗 Properties

✓ Finish Cancel

5. Shipping integrations & Channel Integrations mapping

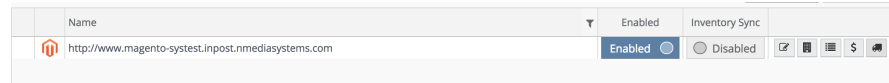

At this point we'll have to map InPost shipping method with shipping service configured in the previous step:

1. Select Settings -> Channel Integrations:

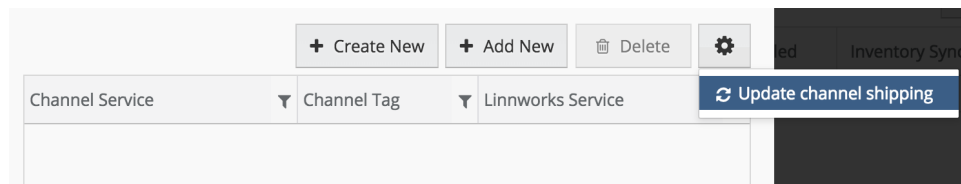

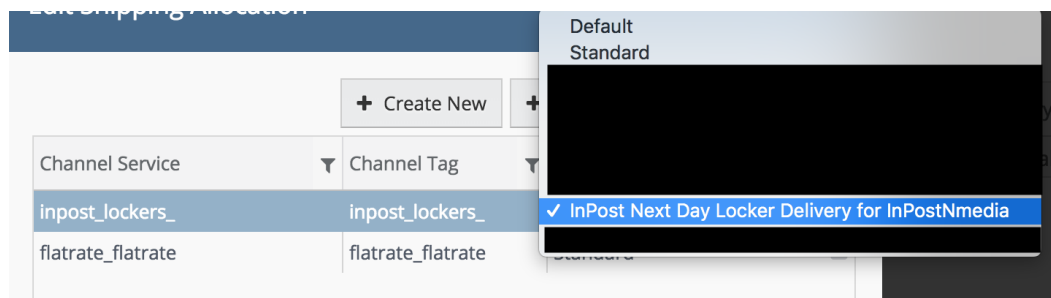

2. From within the list of integrations, next to the channel which uses InPost Shipping, press button with car icon:

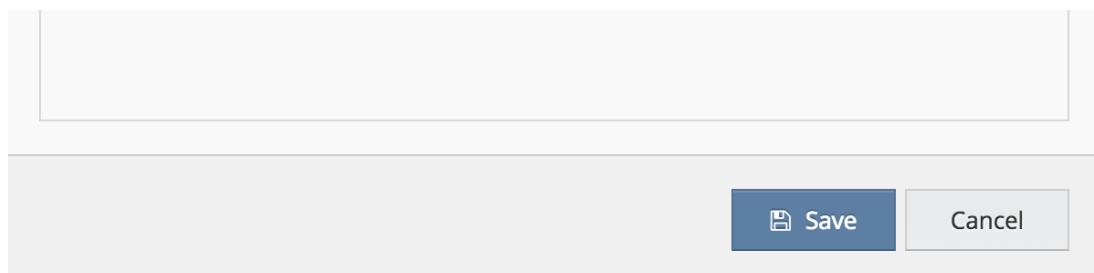

3. If you are not seeing Shipping method which is associated with InPost, press gear icon and choose "Update channel shipping":

4. In the list of shipping methods of your channel which is associated with InPost, choose service created in step 4 (double click in column Linnworks Service)

5. After selection, hit "Save" button. From now on, orders placed with InPost shipping method will be related to InPost Shipping method within Linnworks.

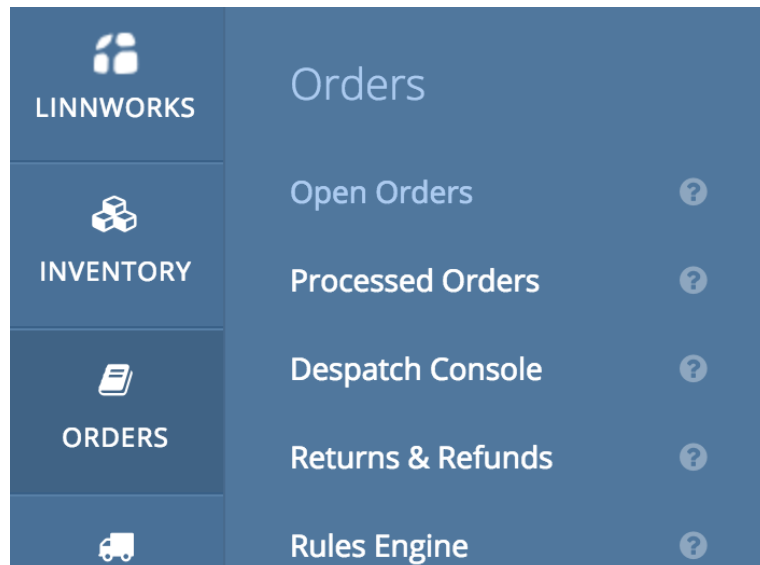

6. Shipping labels

To print labels for new orders:

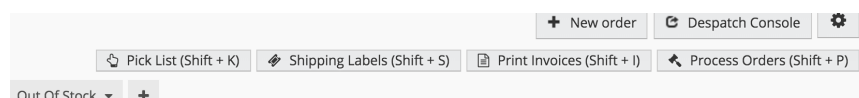

1. Go to Orders -> Open Orders

2. In the list of orders, select order for which you you'd like to print a label, the order should be within "Ready to Process" tab:

Default	Ready to Process	UnPaid	Out Of Stock	+
Customer	General Info	Items	Shipping Information	Totals
Shipping Address Eduard Karnaukh eduard.karnaukh+...	 #101069 via http://www.magento-systest.inpost.nmediasystems.com Date: 22 Jun 2018 09:45	Jack... x1	Carrier: InPostDev ... 0.00 g	Total: 272.50 GBP
Shipping Address Sergii Khomenko sergii.khomenko@...	 #101068 via http://www.magento-systest.inpost.nmediasystems.com Date: 18 Jun 2018 14:06	Eliz... x1	Carrier: InPostDev ... 0.00 g	Total: 254.50 GBP
Shipping Address Eduard Karnaukh eduard.karnaukh+...	 #101067 via http://www.magento-systest.inpost.nmediasystems.com	Retr... x1	Carrier: InPostDev ... 0.00 g	Total: 356.50 GBP

3. Select the order clicking on it and hit "Shipping labels":
